Suicide Awareness Alert

This alert has been issued because of specific intelligence relating to suicide activity on the rail network which it is believed may prompt individuals to take their own lives.

Date Issued: 15 April 2016	Date(s) applicable: 21 April 2016
Issued by: Daniel Cook	

Applicable to:	All Network Rail routes and TOCs
(state route(s)/TOCs/other)	

Nature of alert:	Recommended action:
21 April 2016 On 6 March Suicide Awareness Alert 002 was issued network wide. It highlighted that there were 36 suicide/suspected suicide events on the rail network in April 2015 – 50% more than recorded the previous year and the highest number in any one month since records began. Since its issue an in depth analysis of data in the industry's Safety Management Information System (SMIS) has be undertaken and identified that most suicides/suspected suicides on the railway occur on 21 April (and 21 June) each year.	Network Rail and TOC staff particularly those that interface with the public should be requested to be especially vigilant in respect of those showing signs of distress or upset on the network on 21 April. At high risk priority locations it is recommended that Network Rail, TOC and private security mobile teams together with the BTP develop plans to minimise the potential for suicides at these locations. In recognition of the concern around suicides in April the BTP launched a special operation – Operation Disruption – to help counter them. This is being coordinated by Chief Superintendent Paul Brogden.
